Lucas Teyssier

Email LinkedIn Website Paris, France

Education

Paris Institute of Electronics (ISEP) — Paris, France

Master of Engineering in Artificial Intelligence; 3.7 GPA — *September 2025 – Expected June 2028*

- **Relevant Coursework:** Deep Learning, Reinforcement Learning, Machine Learning, Computer Vision
- **Test Scores:** GRE 340/340; TOEFL 5/6

University of Bordeaux — Bordeaux, France

B.Sc. in Applied Mathematics & Computer Science; 3.3 GPA; Ranked 1/236 — *September 2023 – May 2025*

- **Relevant Coursework:** Linear Algebra, Algorithms, C, Probability and Statistics

Publications / Preprints

M. Balice, D. Lacavalla, **L. Teyssier**, A. Sevincel, Tonio. *MeshAnyOrder*. Submitted to CVPR 2027.

- Autoregressive mesh generation via a Transformer decoder conditioned on a point cloud encoder. Each triangle face is predicted as a set of 9 quantized coordinates relative to the first vertex of the query face.

Experience

Bank of France — Paris, France

Machine Learning Engineer — *Jun 2026 – Dec 2026*

- Co-developed with Mistral AI an OCR + LLM pipeline processing 150,000+ over-indebtedness files per year.
- Designed a schema-driven extraction engine (600+ fields) that handles new document types without code changes.
- Built the evaluation framework (annotated benchmark datasets, field-level F1, CER/WER), raising extraction F1 from 78% to 94% across 12 document types.

MIT CSAIL – Mantis AI — Cambridge, USA

AI Engineer — *Jun 2026 – Sep 2026*

- Built a pipeline that clusters financial news by semantic similarity and analyzes correlations with stock price movements.
- Designed a news clustering pipeline using text embeddings to group articles by underlying meaning rather than keyword overlap.
- Studied the relationship between news cluster dynamics and subsequent stock price changes.

Quant Flow — Paris, France

Data Lead — *Feb 2026 – Present*

- Architected automated pipelines that turn raw market, macroeconomic and alternative data into production-ready trading signals, cutting time from data release to signal to under 3 min.
- Designed and backtested systematic gold trading strategies on 15 years of multi-source data (Sharpe 1.8, max drawdown 9%), with walk-forward validation against overfitting.
- Led a team of 7 across data engineering and research, owning data quality, the signal library and the path from research to production.

Leadership / Achievements

President, Artificial Intelligence ISEP Club — Sep 2025 – Present

- Organized AI conferences featuring leading figures, including Yann LeCun and Arthur Mensch.
- Lead weekly research paper discussions on cutting-edge advances in artificial intelligence.

Winner (1st Prize), Hugging Face × Anthropic Hackathon — Jun 2026

- Built an autonomous AI agent to streamline and automate payroll and end-to-end financial workflows.

Ultra-Trail Runner, UTMB® World Series – *UTMB Index 652* — 2023 – Present

- Completed 32 trail races, including a 132 km / 5,200 m D+ ultra (Grands Trails d'Auvergne 100M, 15th, 17h12).
- Two top-10 finishes (Trail en terres d'Oc: 6th in 2023, 8th in 2025).

Technical Skills & Interests

Coding Languages: Python, C, C++, SQL, Java, CUDA, OCaml
ML & Data Libraries: PyTorch, JAX, Flax, Optax, TensorFlow, NumPy, SciPy, Pandas
Interests: Financial Markets & Trading, Competitive Programming (Master on Codeforces), Chess (Top 0.1% worldwide on Chess.com), Cinema
